Title: Codex of Infinite Wisdom

Author:

As always, the Codex is open to the pages bearing exactly the information you need.
"to return the Codex to the Vortex, place a convex lens exactly midway between the Codex and the Flame of Singularity, so that the light from the flame converges on the Codex. Place a concave lens between the Codex and the Flame of Infinity, so that its light diverges over the Codex. Then place the eight moonstones within the Vortex Cube. Set it on the ground in front of the Codex, and use it to return the Codex from whence it came."
